

MORTGAGE & PROPERTY STRATEGISTS IN SPAIN

Spain, Without the Surprises

What you should know before you buy a home in Spain with a mortgage, told from the perspective of financial strategy.

Where your home in Spain meets finance strategy

Dream Nest · Mortgage credit intermediary regulated by the Bank of Spain · ICI E156

Why Spain?

Light and life outdoors

Long sunny seasons, very varied landscapes and a life lived out on the street.

Healthcare and education

Public and private healthcare, international schools and universities.

Culture and a global language

A strong identity and a language spoken across half the world.

Europe on the doorstep

The euro, Schengen and connections to all of Europe.

Safe and structured

A regulated banking, legal and property framework for buyers and residents.

Looking ahead

Renewable energy, modern infrastructure and increasingly sustainable cities.

The first question for you: do you want to live in Spain, or own in Spain? The answer changes the whole strategy. That's where we start.

Two buyers walk into Spain...

For many buyers, Spain is simply the best place to live. Same country, same market, two very different strategies.

“I want to LIVE in Spain.”

Relocation · retirement · remote work · family · study · a new chapter

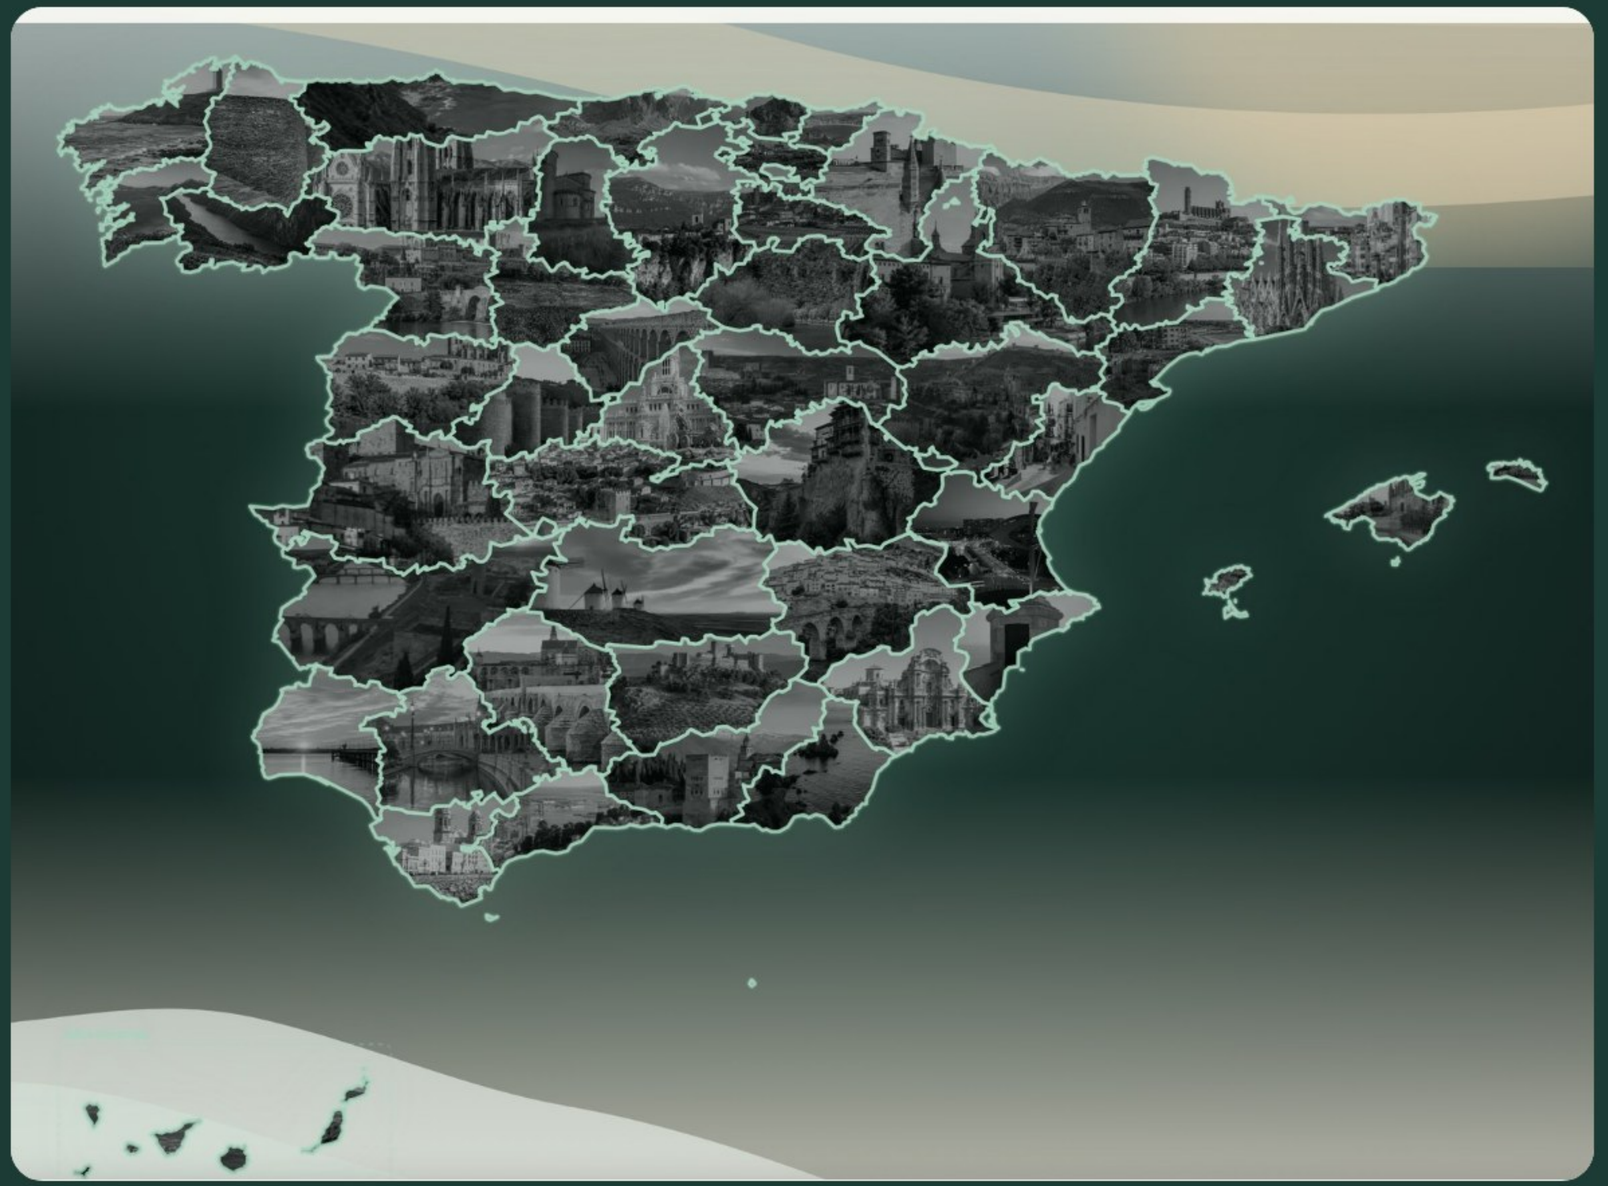

Questions: visas, residency, EU passport, tax, schools and universities, financing a main home

“I want to OWN in Spain.”

Second home · holidays · investment · legacy · future retirement

Questions: second-home financing, cash contribution, taxes, upkeep, currency, management

2 · WHY SPAIN · DISCOVER SPAIN

Every province, a way of life

Our interactive map: real photos, climate, lifestyle and the area that fits you.

Scan and explore

WHY SPAIN? · FOUR CITIES

Madrid, Barcelona, Valencia and Málaga

Madrid

LIFESTYLE

The capital: culture, work, direct flights to the US. City, not beach.

MARKET

Solid, with strong demand: the capital's market.

BUYER

Living in the capital, families, long-term rental.

Barcelona

LIFESTYLE

Sea and city, cosmopolitan, design and food.

MARKET

Premium, with limited supply: highly sought after.

BUYER

Those who want to live there. Note: holiday rentals have strict rules.

Valencia

LIFESTYLE

Mediterranean quality of life: beach, a city on a human scale, mild climate.

MARKET

Great value for the quality of life.

BUYER

Families, remote work, retirement and second homes.

Málaga

LIFESTYLE

Costa del Sol: sun almost all year, international airport.

MARKET

Growing, with a lot of variety between areas.

BUYER

Second homes, retirement and holidays.

There is no best city: there is the one that fits your project. First the goal, then the city, then the home.

3 · HOW IT WORKS · USA VS. SPAIN

Same goal. A different sequence.

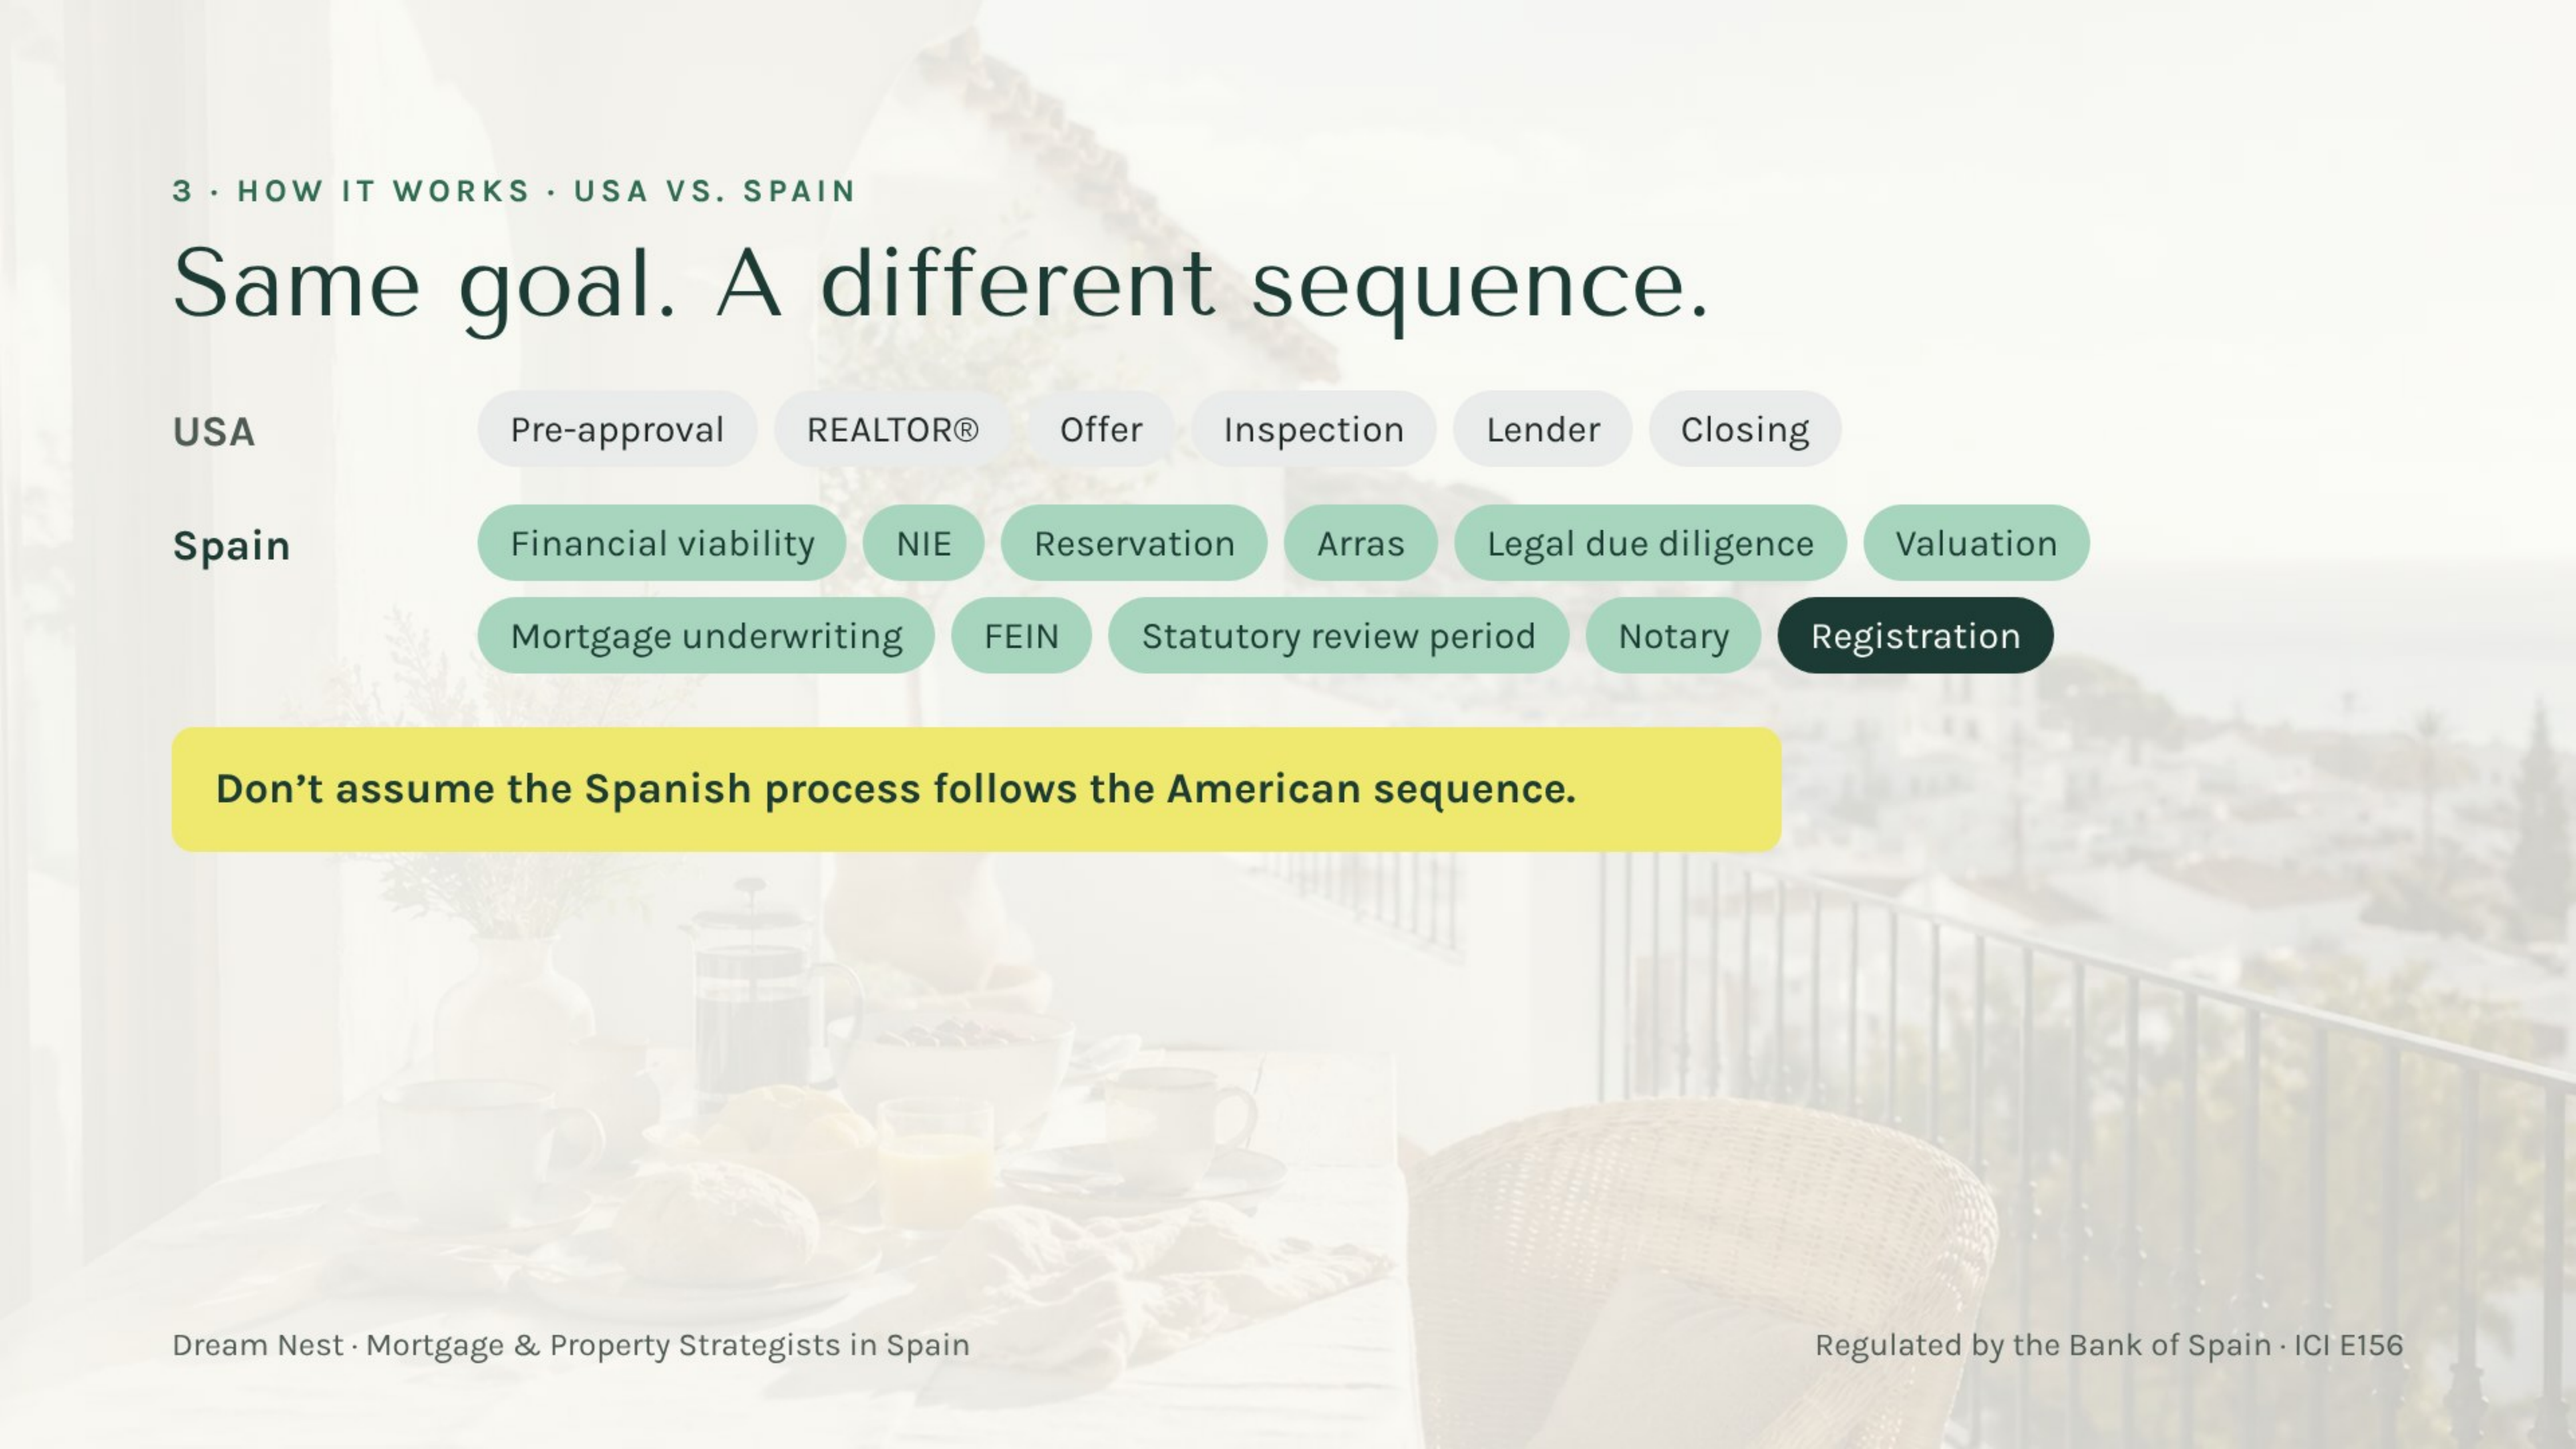

USA

Pre-approval · REALTOR® · Offer · Inspection · Lender · Closing

Spain

Financial viability · NIE · Reservation · Arras · Legal due diligence · Valuation · Mortgage underwriting · FEIN · Statutory review period · Notary · Registration

Don’t assume the Spanish process follows the American sequence.

3 · HOW IT WORKS · STRATEGY, NOT PAPERWORK

A passport doesn't open the bank's door. Stability does.

01

Two separate projects

Buying with a mortgage runs on its own track. Residency and visas are a parallel project, with their own professionals and paperwork.

02

What moves the bank: the use

Main home or second home. A resident buying a main home can reach a higher LTV, even with income from abroad.

03

Resident means living here

A bank treats you as resident once you already live in Spain. Change job, company or career path, and it may want 2–3 tax years again.

Often the smart move: buy and finance before moving to Spain.

3 · HOW IT WORKS · EXAMPLE · VALENCIA · RESALE HOME

A €500,000 home in Valencia: the real numbers

Down payment (30%)		Taxes and fees		5% services cushion		Cash to have ready
€150,000	+	≈ €48,400	+	≈ €25,000	=	≈ €223,400

TAXES AND FEES AT SIGNING

ITP transfer tax (9%)	€45,000
Notary	≈ €1,500
Land registry	≈ €1,000
Gestoría (admin agency)	≈ €500
Valuation	≈ €400
Total	**≈ €48,400**

THE MORTGAGE

Home price	€500,000
Loan (70%)	€350,000
Term	25 years
Interest rate (fixed)	3.5%
Monthly payment	**≈ €1,752**

Illustrative example, not an offer: subject to bank approval. The APR (TAE) depends on fees, insurance and linked products. The bank pays the notary, registry, gestoría and stamp duty of the mortgage deed (Ley 5/2019). Notary, registry, gestoría and valuation: estimates from the dreamnestspain.com calculator. ITP Valencia 9% (2026).

The mistakes we see every week

Not taking the **arras** contract seriously: it commits money, often before the bank has said anything.

Not looking at the **strategy** before buying.

Not understanding and planning the **whole journey**.

Thinking there are plenty of options and **burning** the good ones.

Getting carried away by the **pressure and speed** of the market.

Falling in love with a property before checking its **planning status**.

Believing an **EU passport** improves the financing options.

All of this can be fixed — if someone catches it before signing.

5 · NEXT STEP

Let's talk about your project.

A first conversation, free of charge: we listen to your story, look at what is realistic and tell you the possible options — before you commit to anything.

Your first step: tell us about your project.
